Experience

Wenda S.r.l   *Remote | Bolognia, Italy*
FULL STACK DEVELOPER   *March. 2022 - Current*
- Taking on more responsibility and working as a full stack developer learning new frameworks such as NextJS, TypeScript, Angular, Prisma, ExpressJS, Zod and many more. My main role was to develop, integrate and maintain multiple microservices from scratch. Moreover, I was able to lead in some projects of small teams were my role was to ensure the code deployed is of quality and pushing for them to be done within their sprints.

WebGen Studio.   *Remote | Cairo, Egypt*
FRONT-END WEB DEVELOPER   *July. 2020 - Dec. 2021*
- Worked on developing dynamic and generic UI elements for a Website builder that were customizable through the UI. Besides usual frontend development with ReactJs and CSS, I was introduced to dynamic animation libraries such as gsap, animeJS and PixiJS.

Projects

Job Hunting Agency Website using Camunda   *Münster, Germany*
PROJECT   *2022*
- Implemented a website where job offerings are posted by collaborated companies and applicants can upload their CV where then a Worfklow model that was built using Camunda Modeler is followed through the Camunda Egnine to select qualified candidates.

Secure Folder Application   *Cairo, Egypt*
PROJECT   *2020*
- Built a secure folder app using Python where users can store images and view them securely by setting a password on folders and files. In this project various cryptography concepts where applied.

Database Engine   *Cairo, Egypt*
PROJECT   *2020*
- Developed a Database engine using Java. In this project various concepts relating to concurrency, indexing, serialization, I/O, data structures and optimizing queries were implemented.

Rescue Simulation Game   *Cairo, Egypt*
PROJECT   *2020*
- Developed a game using Java and the MVC framework. In this project the user controls a city's services and tries to rescue as many citizens as possible.
